

Responsible Care®

An Introduction

Corporate HSE

SHAPING *the* FUTURE with PLASTICS

What is Responsible Care®

1. Chemical industry's unique Global Initiative that drives continuous improvement in health, safety, security and environmental (HSSE) performance.
2. Transparent communication with interested parties (i.e. stakeholders) about its activities to improve perception and respond to concerns of the industry.
3. Embraces the development and application of sustainable chemistry, helping our industry contribute to sustainable development while allowing us to meet the world's growing need for essential chemicals and the products those chemicals make possible.
4. First developed in Canada by the Canadian Chemical Producers Association in 1985.
5. International Council of Chemical Associations (ICCA) provides oversight for the program globally.
6. Today it is implemented by chemical federations and their member companies in 53 nations.
7. Not a one-time activity. It will evolve over time to meet the changing expectations of the industry and its stakeholders . No end point!

Element of Borouge Sustainability Framework

Sustainable Development

Sustainable Development is the ability to meet the needs of the present without compromising the ability of future generations to meet their own needs.

As part of our commitment to sustainable development Borouge is committed to Health, Safety and Environment (HSE), being Socially Responsible and the principles of Responsible Care®:

Responsible Care® The chemical industry's global voluntary initiative under which companies, through their national associations, work collaboratively to improve HSE performance.

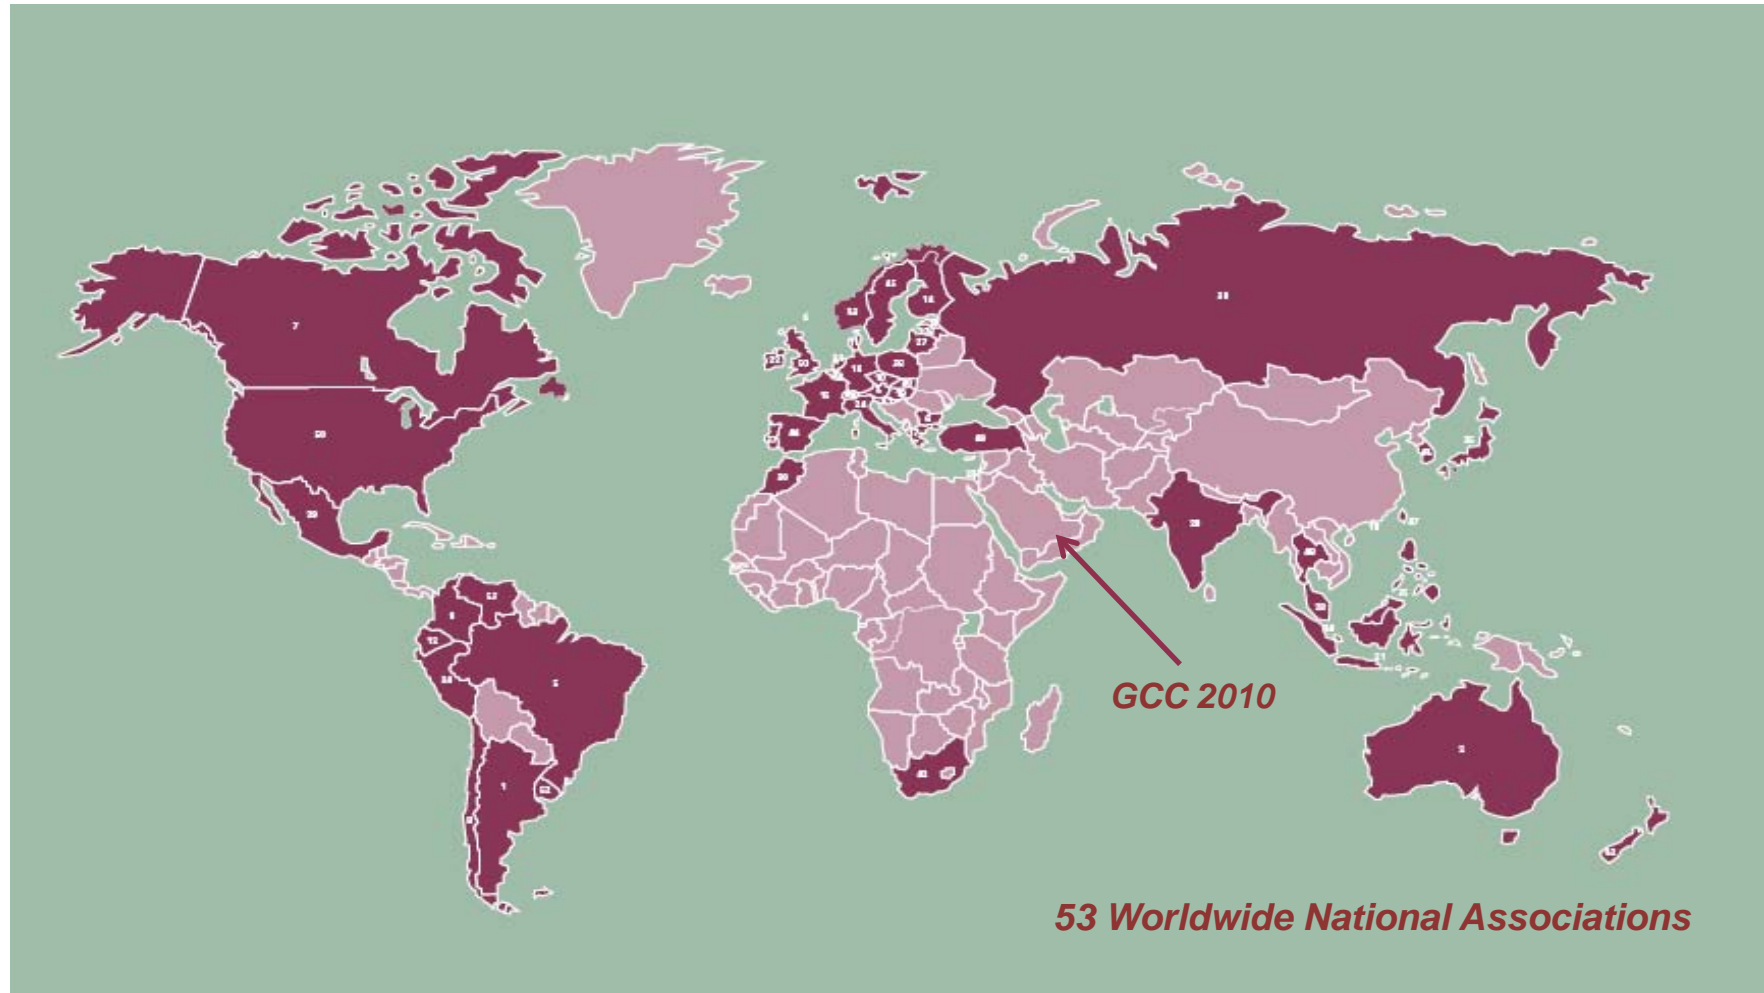

Social Responsibility Programme to invest in the communities where we operate for the better good.

HSE A commitment to our people, the environment and the reputation of our Company.

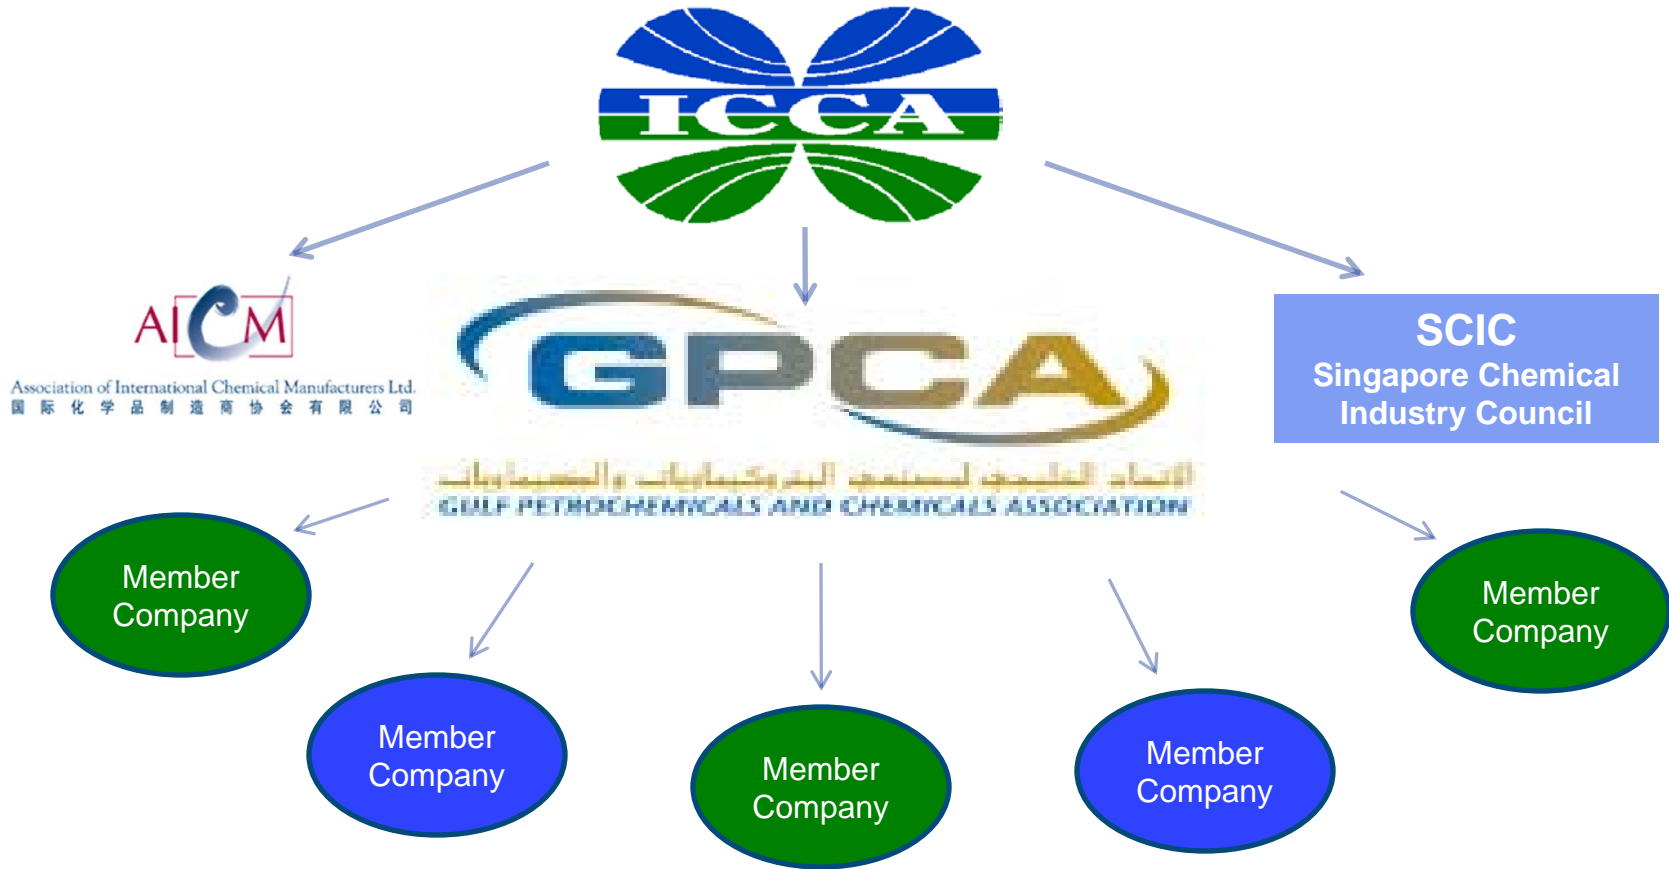

Asset Integrity A structured management approach that assures the integrity of our current and future facilities and equipment.

Borouge Sustainability Framework

Responsible Care® - Framework

Global
Charter

Borouge CEO Commitment

CEO Declaration of Support for Responsible Care®

a member of GPCA, is proud to pledge its support for Responsible Care®

As a member company, we will work with GPCA to:

1. Adopt Global Responsible Care Core Principles.
2. Implement Fundamental Features of GPCA Responsible Care Programmes.
3. Commit to Advancing Sustainable Development.
4. Continuously Improve and Report Performance.
5. Enhance the Management of Chemical Products Worldwide – Product Stewardship.
6. Champion and Facilitate the Extension of Responsible Care along the Chemical Industry's Value Chain.
7. Actively Support GPCA and Global Responsible Care Governance Processes.
8. Address Stakeholder expectations about Chemical Industry activities and products.
9. Provide appropriate resources to effectively implement Responsible Care.

In committing the company to the Responsible Care®, I also agree to clearly demonstrate my personal commitment to the Responsible Care® program. I will set performance targets, allocate clear roles, responsibilities and accountabilities within the company and provide resources, training and management support to meet this commitment.

GPCA Guiding Principles

- To lead our companies in ethical ways that increases the benefits to society by protecting our people, environment and community
- To design and operate our facilities in a safe, secure and environmentally sound manner
- To instill a culture throughout all levels of our organizations to continually identify, reduce and manage occupational and process safety risks
- To steward our products and services through each life cycle stages in order to protect people and the environment
- To promote pollution prevention, minimization of wastes and conservation of energy and other critical resources
- To counsel customers and stakeholders on the safe use, transportation and disposal of chemical products
- To work with Governments, Agencies and Associations at all levels in the development of effective and efficient health, safety, security and environmental laws and industry standards
- To recognize, respect and respond to community concerns about our products and operations.
- To extend knowledge by conducting or supporting research on the health, safety and environmental effects of our products and waste material management
- To measure performance, openly report and make continual progress towards our goal of eliminating accidents, injuries or harm to human health and the environment from our products and operations
- To seek continual improvement in our integrated Responsible Care Management System® to address health, safety, security and environment performance
- To promote the principles and practices of Responsible Care by sharing experiences and offering assistance to others who produce, handle, use, transport or dispose of chemicals
